

**Work To Support Delta Vision -
In addition to work in related efforts**

	lead	status
Science		
A. Delta Science Advisors - "gatekeepers" and advice	Healey and Mount	appointed
B. Address specific scientific issues (e.g., variable Delta)	Healey and Mount	underway (e.g., workshop in June)
C. Review work products from scientific perspective (e.g., template to assess visions)	Healey and Mount	approach being developed
D. Participate in assessment of possible visions	Healey and Mount	approach being developed
E. Raise and address issues of science	Healey and Mount	underway (e.g., water quality letter)
F. Prepare science advice in formats useful to Delta Vision	Healey and Mount	underway (e.g., State of Delta Science chapters)
Context memos, Executive Order categories + AB 1803		
1. The environment, including aquatic	Mike Healey	<i>first iteration</i>
2. Land use and land use patterns,	Elizabeth Patterson	<i>first iteration</i>
2a. Agriculture	Ken Trott	<i>first iteration</i>
3. Transportation, including streets,	URS	<i>first iteration</i>
4. Utilities, including aqueducts,	URS	<i>first iteration</i>
5. Water supply and quality,	Tully & Young	<i>second iteration</i>
5a. <i>Water conservation: Demand</i>	Mark Roberson	<i>second iteration</i>
6. Recreation and tourism, including	URS	<i>first iteration</i>
7. Flood risk management, including	Sergio Guillen	<i>second iteration</i>
8. Emergency response	URS	first draft: needs addition of human
9. Local and state economies	URS	<i>first iteration</i>
10. Governance	unknown	
11. Strategic financing	California Research	<i>work underway: no contract in place</i>
Other specific work products		
12. "Sustainable" context memo	Tully & Young	<i>second iteration</i>
13. Water governance context memo	Tully & Young	<i>second iteration</i>
14. Suisun Marsh context memo	Victor Pacheco	first draft; being revised
15. Existing Delta governance analysis	April Manatt	first draft
16. Analyses of governance of other large ecosystems	Fred Silva	<i>first iteration</i>

**Work To Support Delta Vision -
In addition to work in related efforts**

17. Delta agriculture stakeholder interviews	Ken Trott	first draft
18. Analyze Notice of Intent		<i>item deleted</i>
19. Analyze possible flood by pass for San Joaquin River	DWR	<i>request made</i>

Tools to support development of proposals

i. Develop common terms, maps, spatial scales, science, etc.	Articulation team: Leo W ++	two meeting held; effective graphic developed and used
ii. Develop common building blocks (e.g., re levees)	????	some from DRMS and BDCP
iii. Compile and test experts' plausible actions lists	Leo Winternitz +	beginning - e.g., eco geo work shop

Support for Task Force in assessing visions and developing recommendations

a. Develop and test template for assessing emerging visions	Kirlin	Discussion underway re science component
b. Team to support Task Force in assessing proposed visions and developing the Task Force recommendations	Kirlin	Waiting for resources to launch
c. Legal analyses	<i>Office of Attorney General</i>	<i>legal analyses as requested</i>
d. Exploration of public trust approach to resource management (of interest and use, but probably supported outside DV)	<i>a few law schools, with Clark Kelso of McGeorge organizing</i>	<i>discussion underway re scope and participants-</i>

Note: First drafts of context memos and work products (#s 1-17) receive a preliminary reading from one of more staff members before being released as "first iteration" work products which are posted for public comment. In addition to public comments, work products are reviewed by scientists and managers. After a period for review (e.g., two weeks), the author(s) make revisions addressing the comments received and the work is released as a second iteration. Two or three iterations of comment, review and revisions are anticipated. Other technical work products would receive similar public, scientific and managerial review.
